1 Summary / Deliverable report

FORTEe has a password-protected website for internal use, which was launched online on 01 March 2021 (Figure 1). All FORTEe members have received individual login details to access the internal website. The website serves as a centralized and safe file exchange platform for all the FORTEe members. All the important reference documents for FORTEe (such as the Grant Agreement and Consortium Agreement) and useful templates are stored safely in the file section (Figure 2). Manuscripts and project-related documents will be uploaded to this platform throughout the project lifecycle.

The website also contains a participant registrations tool for project meetings and an internal task manager, which provides an overview of the project progress with a reminder and notification function (Figure 3). The website also offers other functions, such as a participant directory, which lists the contact details of all FORTEe members, and a calendar that can be used internally.
